Experience Certificate

This is to certify that Ms. Tista Ghosal worked as a Research Intern under my supervision at the Conflict Resolution and Peace Research programme, NIAS, Bengaluru between August 2022 and August 2023. During her one-year internship, Tista was involved in researching the internal displacement issues in India. It is heartening to mention that, Tista was quick to pick up the important issues and dimensions of internal displacement in India. She also actively participated in the classes and lectures organized by NIAS. As a student, Tista has the ability to think originally and independently while maintaining a cordial relationship with the team members and passionately debating and discussing with them. I have seen her progress substantially in understanding various issues relating to politics, political process, vulnerabilities of the marginalized people, and governance and policy making in Indian context. I have been extremely happy with her sincerity, academic integrity, and good manners.

I wish her all success in future.

Dr. Anshuman Behera
